

NZSki's experienced Pre Hospital Emergency Care trained ski patrollers work closely with Medical Rescue's pre hospital Medical Team at both The Remarkables and Coronet Peak.

The Patrol Medical Teams are comprised of emergency doctors, registered nurses, and sports physiotherapists. If you wish to see a doctor, nurse or physiotherapist please present to The Medical Rescue / Patrol base which can be identified by the large green cross on the building. If you are unable to get to the base, just ask for the ski patrol who will help you.

If you do injure yourself on the ski area, you will be looked after jointly by the ski patrol and patrol medical team. Whenever possible your injury will be managed onsite and you will be free to return to the slopes and make the most of your day on the mountain. If further treatment or investigations are required, the medical team will provide emergency interventions and arrange your transfer to local medical facilities, secondary or tertiary hospitals.

Medical Rescue is ISO 9001 accredited and a recognised clinical practice registered with Medicare Australia and the Accident Compensation Corporation in New Zealand.

Medical Rescue also holds accreditation for special skills training in Pre Hospital and Retrieval Medicine for advanced trainees with the Australasian College of Emergency Medicine. Doctors are supported by our Emergency Medicine Specialists who hold fellowship to the Australasian College of Emergency Medicine and in addition to onsite clinical training are available every day of the season to provide telephone or video link support to the mountains.

Medical Rescue's international services include.

- Alpine ski patrol medical teams
- Offshore rescue helicopters
- International jet air ambulances
- Marine based jet ski medical teams
- Private ambulance services
- 24 hour clinical support to remote mine sites and mobile medical teams.

The skills and equipment provided to support the ski area are the same skills and equipment provided on Medical Rescue's international air ambulances and rescue helicopters.
