ABOUT US

Officially New Zealand's Best Ski Resort for the ninth year in a row.* Mt Hutt is Canterbury's big friendly mountain with some of the most consistent snowfall in the country delivering a long, white season.

At an altitude of 2086m with a 683 vertical drop Mt Hutt boasts the South Island's highest chairlift, leg-burning runs and some of the country's most spectacular views.

As well as genuine Kiwi hospitality, guests can enjoy wide groomed slopes, lift access for all abilities, top to bottom terrain parks and some of the best off-piste skiing around. Mt Hutt has 365 ha of skiable terrain and state of the art snowmaking to top up the slopes.

Mt Hutt is striving to become neutral. To achieve this, substantial investment has been put into upgrading equipment, waste management initiatives and native planting.

Other specific reduction initiatives include the recent upgrade of our trail grooming fleet, utilisation of SnowSAT technology and installation of energy-efficient snowmaking technology.

Mt Hutt also hopes to encourage more native birds back to the mountain by creating a habitable environment for them through pest eradication and native planting.

*Mt Hutt has been named New Zealand's Best Ski Resort at the World Ski Awards every year since 2015.

OVERVIEW

LIFTS

New Zealand's first eight-seater chair, one six-seater detachable chair, one triple chair and two learner conveyors.

TARGETED OPENING DATE	13 June

- Terrain Access Gate
- Alpine Spa
- Mt Hutt is a Smoke & Vape Free Ski Area

ROAD TO CARBON NEUTRAL

Mt Hutt belongs to family owned and operated business – NZSki. Our sisters mountains are down South in Queenstown - The Remarkables and Coronet Peak.

At NZSki our primary greenhouse gas emission sources are diesel fuel - used for grooming, transport and building heating - and electricity. Together our three mountains produce approximately 3000 Tonnes of greenhouse gas emissions (Scope 1 and 2 only) annually.

HOW WE'RE MAKING A DIFFERENCE

WASTE REDUCTION:

In 2024, we introduced Sorting Stations to our food/drink outlets, reducing waste to landfill by 42% through better recycling and reusable tableware.

TRANSPORT EFFICIENCY:

Our carpool priority initiative at Mt Hutt cut guest-related emissions by 30%, saving around 11 tonnes of CO2 per day at our sister mountain.

SUPPORT FOR CONSERVATION:

In 2024, we raised \$21,700 for the Kea Conservation Trust and \$29,800 for the Westpac Rescue Helicopter Trust.

RENEWABLE ELECTRICITY:

We've partnered with Meridian Energy to use their Certified Renewable Energy product. This allows us to report our mountain market-based Scope 2 emissions as zero.*

CARBON CREDITS:

We've purchased carbon credits from Climate Action Company (formerly Carbonz). Since 2022 we have purchased 1336 tonnes of carbon credits to offset emissions.

*Using the market-based reporting methodology as per the GHG Protocol's Scope 2 Guidance.
